

# Lecture Series

# Scale

September 2025 – June 2026

All talks start at 19:30 and will be in English.

Monday, 29 September 2025  
Mina Gorij

Monday, 20 October 2025  
Joshua DiCaglio

Monday, 17 November 2025  
Nurit Bird-David

Monday, 1 December 2025  
Yannick Giovanni Marshall

Monday, 23 March 2026  
Lisa Messeri

Monday, 18 May 2026  
Heather Love

Scales are used to quantify properties such as length and temperature, or also to measure popularity and affect. But as Alice discovers in Wonderland, a change of scale can also have dramatic qualitative consequences. It disrupts customary ways of perceiving, acting, and being — to the point of feeling as ‘queer’ to her as a caterpillar’s metamorphoses. Helped by the arguably inextricable intertwining of different meanings and aspects of scale, Alice’s experiences continue to provide apt metaphors for the disorienting importance and effects of scale and scaling at a time of hyperglobalization and the so-called anthropocene.

Scale is indeed a highly ambiguous notion, even when one only considers the meanings deriving from the Latin or Italian *scala*, ladder. It simultaneously denotes the whole ladder, one of its steps, and the relation between two steps: The scale of a cartographic map is the ratio between a distance on the map and a distance on the ground, but any particular length also defines a scale, and the range of scales from the subatomic to the planetary scale is part of the spatial scale. Paradoxically recursive, scale combines and helps mediate quantity and quality, as well as subjective perception, objective material properties, and contingent construction.

If different disciplines, discourses, and dispositives each have their privileged scales to which they tend to reduce others, what may be gained by thinking them together, acknowledging both the relative autonomy of particular scales — each with their own affordances, limitations, rules, even laws and ontologies — and their interdependence — each affecting and being affected by other scales? What is the critical purchase of developing multiscale architectures or patchworks of scale-specific, mutually inconsistent and irreducible descriptions, theories, and models? How might the tensions be made productive where they overlap or come into contact? The ICI’s Lecture Series ‘Scale’ will address such questions by reflecting upon the critical role of scale within and across a wide range of different fields.
